

# HANNAH NESSER

71 Highland Ave., Unit 1, Cambridge, MA 02139 | hnesser@g.harvard.edu | 651.592.2771

---

## EDUCATION

### HARVARD UNIVERSITY

Ph.D. Candidate, School of Engineering and Applied Sciences

CAMBRIDGE, MA

2017 - present

Researches high-resolution, analytic inversions satellite observations of atmospheric methane concentrations.

### YALE UNIVERSITY

B.S., Environmental Engineering, with Distinction

NEW HAVEN, CT

2012 - 2016

Led a senior research team to develop an operational prototype of a portable air quality monitor that measured concentrations of critical pollutants for an EPA SEARCH Center.

### SCHOOL FOR INTERNATIONAL TRAINING

B.S., Environmental Engineering, with Distinction

FORT DAUPHIN, MADAGASCAR

August - December 2014

Conducted research on the mechanical and social feasibility of using biogas as a fuel source for an essential oils still in two remote communities.

## AWARDS

- National Science Foundation Graduate Research Program Fellowship (2017 - 2022)
- Bok Center Certificate of Distinction in Teaching (2019)
- D. Allan Bromley Prize in Environmental Engineering (2016)
- Richter Summer Fellowship (2015)

## RESEARCH

### HARVARD UNIVERSITY

Advisor: Daniel Jacob

CAMBRIDGE, MA

2017 - present

- Works to improve constraints on the magnitude and distribution of methane emission sources using high-resolution analytic inversions of observations from the TROPOMI instrument aboard the Sentinel-5 Precursor satellite.
- Develops and applies methods to conduct high-resolution analytic inversions at reduced computational cost while preserving information content.
- Implements those methods to improve estimates of methane emission sources at high resolution over North America using TROPOMI observations.

### YALE UNIVERSITY

Advisor: Drew Gentner

NEW HAVEN, CT

2015 - 2016

- Served as Design Lead for a senior research team developing a first-generation operational prototype of portable and stationary air quality monitors measuring concentrations of greenhouse gases and EPA criteria pollutants using low-cost sensors. The sensors were designed for deployment in Baltimore, MD as part of an EPA SEARCH Center.

# TEACHING

**HARVARD UNIVERSITY | DEPARTMENT OF EARTH AND PLANETARY SCIENCES**      **CAMBRIDGE, MA**  
**Atmospheric Chemistry, Teaching Fellow**      **Spring 2020**

Taught weekly section and office hours, including material preparation. Created and graded homework assignments. Developed and taught midterm review session. Helped lead the transition to remote learning following COVID-19 adjustments.

**HARVARD UNIVERSITY | DEPARTMENT OF EARTH AND PLANETARY SCIENCES**      **CAMBRIDGE, MA**  
**Atmospheric Chemistry, Teaching Fellow**      **Spring 2019**

Taught weekly section and office hours, including material preparation. Created and graded homework assignments. Contributed to exam development and graded exams. Developed and taught midterm and final review sessions.

# PRESENTATIONS

Reduced-Cost Construction of Jacobian Matrices for High-Resolution Inverse Modeling, presentation at the 2020 AMS meeting, Boston, MA, January 17, 2020.

Reduced Cost Construction of Jacobian Matrices for High-Resolution Inverse Modeling, poster at the 2019 AGU meeting, San Francisco, CA, December 12, 2019.

Decreasing the computational cost of analytic inversions of high-resolution satellite observations, presentation at the Netherlands Institute for Space Research (SRON), Utrecht, Netherlands, June 11, 2019.

Phys.*, 19, 7859-7881, 2019.

# ACTIVITIES

Co-President, Graduate Environmental Action Team (GrEAT); Volunteer, Harvard Law School Emmet Environmental Law and Policy Clinic.
