

HANNAH NESSER

EDUCATION

HARVARD UNIVERSITY

Ph.D. Candidate, School of Engineering and Applied Sciences

CAMBRIDGE, MA

2017 - present

Researches high-resolution, analytic inversions of satellite observations of atmospheric methane concentrations.

YALE UNIVERSITY

B.S., Environmental Engineering, with Distinction

NEW HAVEN, CT

2012 - 2016

Led a senior research team to develop an operational prototype of a portable air quality monitor that measured concentrations of critical pollutants for an EPA SEARCH Center.

SCHOOL FOR INTERNATIONAL TRAINING

FORT DAUPHIN, MADAGASCAR

August - December 2014

Conducted research on the mechanical and social feasibility of using biogas as a fuel source for an essential oils still in two remote communities.

AWARDS

- National Science Foundation Graduate Research Program Fellowship (2017 - 2022)
- Harvard University Department of Earth and Planetary Sciences Graduate Teaching Award, awarded in recognition of superior service and excellence in teaching (Spring 2020)
- Special Commendation for Extraordinary Teaching in Extraordinary Times (COVID-19), awarded to 10% of Harvard instructors based on nomination by students (Spring 2020)
- Bok Center Certificate of Distinction in Teaching, awarded to Harvard Teaching Fellows who received an average score of 4.5 or above (2019)
- D. Allan Bromley Prize in Environmental Engineering, awarded to a Senior who has exhibited superior accomplishment and scholarly achievement in Environmental Engineering (2016)
- Richter Summer Fellowship (2015)

RESEARCH

HARVARD UNIVERSITY

Advisor: Daniel Jacob

CAMBRIDGE, MA

2017 - present

- Works to improve constraints on the magnitude and distribution of methane emission sources using high-resolution analytic inversions of observations from the TROPOMI instrument aboard the Sentinel-5 Precursor satellite.
- Develops and applies methods to conduct high-resolution analytic inversions at reduced computational cost while preserving information content.
- Implements those methods to improve estimates of methane emission sources at high resolution over North America using TROPOMI observations.
- Studies the influence of boundary condition errors on regional inverse analyses.

- Served as Design Lead for a senior research team developing a first-generation operational prototype of portable and stationary air quality monitors measuring concentrations of greenhouse gases and EPA criteria pollutants using low-cost sensors. The sensors were designed for deployment in Baltimore, MD as part of an EPA SEARCH Center.

TEACHING

HARVARD UNIVERSITY | DEPARTMENT OF EARTH AND PLANETARY SCIENCES **CAMBRIDGE, MA**
Atmospheric Chemistry, Teaching Fellow **Spring 2020**

Taught weekly section and office hours, including material preparation. Created and graded homework assignments. Developed and taught midterm review session. Helped lead the transition to remote learning following COVID-19 adjustments.

HARVARD UNIVERSITY | DEPARTMENT OF EARTH AND PLANETARY SCIENCES **CAMBRIDGE, MA**
Atmospheric Chemistry, Teaching Fellow **Spring 2019**

Taught weekly section and office hours, including material preparation. Created and graded homework assignments. Contributed to exam development and grading. Developed and taught midterm and final review sessions.

MENTORSHIP

Margaux Winter, undergraduate thesis student, An MGWR Framework for Improving Source Attribution of Inversion-Derived Methane Emissions, Harvard University, September 2019 - December 2021.

PRESENTATIONS

Reduced-rank inversion of TROPOMI methane observations to infer 2019 North American methane emissions at $0.25^\circ \times 0.3125^\circ$ resolution, invited presentation at the Orbiting Carbon Observatory (OCO) Flux telecon, Remote, July 27, 2022.

High-resolution 2019 North American methane emissions inferred from TROPOMI satellite observations of atmospheric methane, presentation at the 10th International GEOS-Chem Meeting (IGC10), St. Louis, MO, June 8, 2022.

High-resolution 2019 North American methane emissions inferred from TROPOMI satellite observations of atmospheric methane, invited presentation at the NASA Jet Propulsion Laboratory's (JPL's) Carbon Club seminar, Remote, February 17, 2022.

High-resolution 2019 North American methane emissions inferred from TROPOMI satellite observations of atmospheric methane, poster at the 2019 American Geophysical Union (AGU) Fall Meeting, New Orleans, LA, December 17, 2021.

Reduced-Cost Construction of Jacobian Matrices for High-Resolution Inversions of Satellite Observations of Atmospheric Composition, presentation at the North American Carbon Project (NACP) 7th Open Science Meeting, Remote, March 12, 2021.

Reduced-Cost Construction of Jacobian Matrices for High-Resolution Inverse Modeling, presentation at the 2020 American Meteorological Society (AMS) Annual Meeting, Boston, MA, January 17, 2020.

Reduced Cost Construction of Jacobian Matrices for High-Resolution Inverse Modeling, poster at the 2019 American Geophysical Union (AGU) Fall Meeting, San Francisco, CA, December 12, 2019.

Decreasing the computational cost of analytic inversions of high-resolution satellite observations, presentation at the Netherlands Institute for Space Research (SRON), Utrecht, Netherlands, June 11, 2019.

DIVERSITY, INCLUSION, AND BELONGING EFFORTS

- Co-founder and Co-lead, Harvard Atmospheric Chemistry Modeling Group Diversity, Inclusion, and Belonging (DIB) subgroup, Cambridge, MA, 2020 - 2021.
- Graduate Student Representative, Harvard Earth and Planetary Sciences and Environmental Science and Engineering Diversity, Inclusion, and Belonging (DIB) Committee, Cambridge, MA, 2020 - 2021.
- Co-lead of Harvard Earth and Planetary Sciences Unlearning Racism in Geoscience (URGE) pod, Cambridge, MA, 2020.

POLICY EXPERIENCE

- Member (5 months) and Co-president (16 months), Harvard Graduate Environmental Action Team (GrEAT), Cambridge, MA, Fall 2019 - Spring 2021.
 - Contributed to a public comment on a proposed rollback of oil and natural gas methane standards and led efforts to write public comments on proposed regulations on the disposal of coal combustion residuals and on the transparency of science used for rule making.
- Volunteer, Harvard Emmet Environmental Law and Policy Clinic, Cambridge, MA, Fall 2019.
 - Contributed to a white paper project on EPA PM_{2.5} measurement standards.
- Legislative Assistant, Union of Concerned Scientists, Washington, D.C., January 2017 - August 2021.
 - Led organization efforts to track federal budget and appropriations processes for EPA, DOE, NOAA, NASA, FEMA, and the State Department in the House, Senate, White House, and Agencies.
- Affiliate, ParisAgreement.org, Paris, France and New Haven, CT, December 2015 - May 2016.
 - Attended COP21 to support the launch of ParisAgreement.org, an analysis and media platform designed to increase pressure on negotiators to achieve consensus, which received media coverage by The Economist, The New York Times Dot Earth blog, and The Guardian.
